STOCKHOLDERS' MEETING

A SPECIAL MEETING of the stockholders of the OAHU RAILWAY AND LAND COMPANY will be held at the Chamber of Commerce rooms in Honolulu on Friday, August 17, 1900, at 4 o'clock p. m., for the purpose of considering the sale of treasury stock.

ASSESSMENT NOTICE.

WAILUA AGRICULTURAL CO., LIMITED.

ARRANGEMENTS HAVE BEEN CALLED for the assessment of the stock of this company as to become due and payable at the office of Castle & Cooke, Ltd., on July 15th, 1900, 10 per cent (\$10 per share) delinquent August 15th, 1900, 10 per cent (\$10 per share) delinquent October 15th, 1900.

FIRST AMERICAN BANK OF HAWAII, LTD.

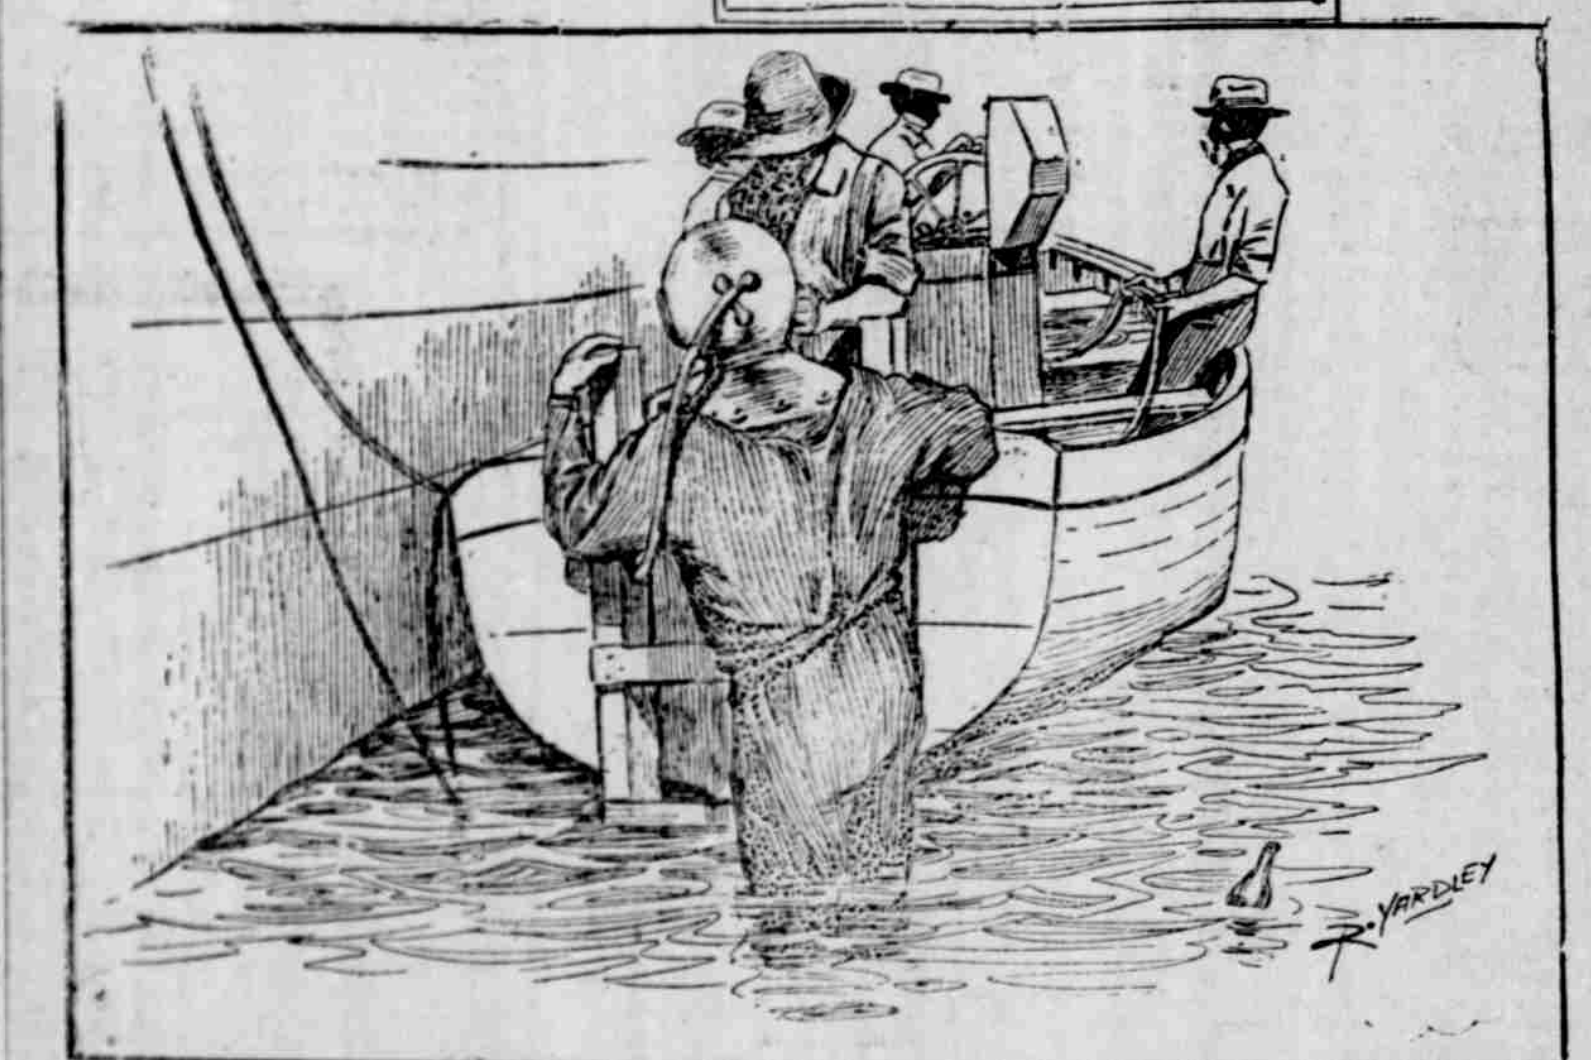

NOTICE IS HEREBY GIVEN THAT the Board of Directors of the First American Bank of Hawaii, Ltd., have decided the final assessment of 10 1/2 per cent on the capital stock of the corporation, payable within thirty days, at the banking house of the corporation, from this date and delinquent August 1st, 1900.

DIVER SEEKS TO TELL
DUNREGGAN'S INJURIES

Beneath the Water
He Feels Her
Wounds.

SCENE AT THE OLD
FISHMARKET WHARF

Young Brothers' Task on the
Bark Saved From
Shipwreck.

With one spending most of his time in a diving suit beneath the iron bottom of the bark Dunreggan and the other putting big time on deck handling the gasoline engine which is keeping the salt water from coming in through the leaks too fast, Herbert and William Young, brothers, find little time nowadays for shooting around the harbor in their rapid little steam launch.

Herbert Young is a six-footer and wears the largest-sized diving suit obtainable. He has spent many interesting hours on the muddy, oozy bottom of the harbor, poking around, half doubled up, feeling with his fingers for leaks in the joining of the plates of the hull, straining his eyes in the semi-darkness for it is pretty dark beneath the Dunreggan as she lies against the old fishmarket wharf, with the steamer Helene close by on her starboard side.

Herbert Young is a very tight-mouthed fellow and won't talk much. He wants to make a most thorough examination of the Dunreggan's bottom before he says what's the matter with her. He has almost completed his search for holes and loose rivets and so forth, but it is necessarily slow work under existing conditions and he has still another look or so to take.

FOR CAMPING OUT.

Tents, Sleeping Bags and Many Other Things Provided for This Purpose.

Camping-out things have of course long been articles of sale by the dealers in sportsmen's goods, but there never was a time before when they were offered in such variety, and of such perfect adaptability to their use, as now. Of tents there is a great variety, of all kinds and styles and sizes, for from two men up; and if these tents are not in stock the dealer makes any of them to order within twenty-four hours.

There are camp stoves and camp ovens and various camp cooking utensils. Among the new things in this line are the cooking kits of aluminum, which are wonders of lightness and compactness, such kits are made of various sizes, for from two persons upward. An aluminum cooking kit and camp outfit for six persons occupies a space little, if any, greater than that taken up by an ordinary water bucket. Such a kit contains four pails, nesting snugly together and each provided with a cover and a bail. There are in the kit knives and forks and spoons and cups and plates and coffee pot and frying pans—everything that could be needed for the convenience and comfort of the campers, and everything made so that it will go inside the innermost of the nest of pails. The frying pans are ingeniously contrived to be used with a pole handle, which is cut at the camp and inserted in the handle of the frying pan, so that the cook doesn't have to bend down over the fire, in the smoke, but can, with his long handled frying pan, stand up straight and away from the heat and manipulate the pan in comfort.

less fuel for his lungs he jerks the pipe twice.

Herbert Young reports some queer things on the harbor's bottom, in the soft mud. Empty gin, beer, and whiskey bottles, tin cans, old, odd pieces of iron, bricks, coal, stone, pottery, pails, an old propeller or two, chains, a rotting rudder stuck in the mud and many other curiosities of various kinds.

The Dunreggan is fast unloading and is slowly coming up out of the water. The water in her hold remains about the same however. When she gets a certain number of inches of water in through her leaks the little gasoline engine starts up and pumps it out to a certain limit and then takes a rest until she fills again to the necessary point. Between pumpings she has about nineteen inches of the ocean in her hold amidships. The water forward and aft runs to the middle of the ship very slowly. When about twenty-three or twenty-four inches is indicated amidships William Young starts the pump.

Notwithstanding the fact that a diver at work is no uncommon sight, a great many people gather on the wharf to see the diver operate. Men working on the front pass to watch Herbert Young in his rubber suit and metal helmet and never seem to tire. A sailor, the other day, a man of an inquiring and adventurous frame of mind, anxious to know how it felt to put on a diving suit and go beneath the water, persuaded the diver to let him try the experiment. He was dressed in the big rubber combination garment and the helmet was screwed on. It was great sport for observers to see how helplessly the green diver handled his legs, heavy leads were of course attached to his feet and it was an experience which he had never before felt. He was carefully lowered beneath the water and allowed to go down clear of the vessel and was kept under only a few minutes. First he tugged at the pipe for more air, then he signalled for less, then he mixed the signals all up. Those in the boat didn't know what he wanted.

buy a sleeping outfit that can be made ready for use in much less time than he could build a bed from nature's materials, and that would at the same time, give him, in the midst of nature, absolute luxury, besides being, when not in use, light and portable to a high degree.

Folding camp beds have long been made, but they are made nowadays lighter and to do up in complete form than ever. One can buy a camp bed very comfortable to sleep on, that will do up for transportation into a light bundle 3 feet long by 6 inches square. If he wants something more comfortable still he can buy an air mattress, which can be quickly inflated, and which, deflated, makes a roll thirty inches in length by five inches in diameter. Sleeping bags, which, not many years ago were articles of limited sale, and which when used, were more likely to be supplied by the guides, are nowadays made in variety and sold in considerable numbers. They are lined with furs of various kinds, or with lamb's wool, or blankets, heavy or light, sleeping bags being made for use in any climate. Sleeping bags may be costly or inexpensive, according to the materials of which they are made.

There are camp chairs of various kinds, old and new, and tables likewise, all highly portable, a table for four, for example, being made to fold into a bundle 3 feet long and 4 inches thick one way and 6 the other.

ed for his signals came in a bunch and meant lower away, more in, less air, haul in and everything else. To be on the safe side, although there was absolutely no danger, the adventurer was pulled up. When the helmet was removed the fellow couldn't talk, but seeing a bucket of fresh water handy, motioned for a drink. When he got it he was all right and explained that nothing had been the matter below except that he "had forgotten how to breathe for a little while." He thought he might get used to diving after awhile but didn't think he wanted to learn just now.

One of the most peculiar incidents which have occurred since the Dunreggan has been at the wharf is one connected intimately with the diver's suit.

The sailors aboard the British bark are not supplied with mosquito nets; this in itself is nothing extraordinary. The mosquitoes have been unusually ferocious along the water front of late, however, and they seem extremely fond of English blood for they have attacked the Dunreggan's crew without mercy. Two or three of the younger and more fat of the sailors bear unmistakable signs of the merciless onslaught of the pesky little insects. These men's faces are swollen terribly, their eyes being almost hidden. One of them, the youngest man aboard, has not slept for many nights and yesterday was unable to go to work being played out. Last night a bright idea struck the young Britisher. After all hands had turned in he quietly got over the vessel's side and let himself down into the Young brother's boat where the diving suit is kept covered by a tarpaulin. Quietly slipping into the diving suit, he unscrewed the front "window" from the metal helmet, securely stretched a silk pocket handkerchief over the opening, then screwed the helmet on to the rest of the suit, lay down in the boat and went fast asleep, laughing softly to himself at the indignant mosquitoes as they hovered defeated and sadly left around him in his impregnable armor.

venient to carry and use; there are waterproof match boxes, and so on. There is in fact to be found in these days, for camping out, everything that could be required for convenience, for comfort, or for luxury, and all these up-to-date in economy of place and weight.

The camper-out can also get in the sporting goods establishment food in considerable variety, this being like the sportsman's camp equipage, food being put up in the compactest possible form. He can buy a cylindrical paper box of the size of a quart measure, and very light to carry in the form of a powder, the yolks of six dozen eggs; in a form somewhat like a dynamite cartridge, six inches in length by an inch or an inch and a half in diameter can be bought, in this highly condensed form, peas sufficient to make two or three gallons of pea soup. Potatoes and other vegetables can be bought condensed, in a box not much larger than that of a penny box of matches are sold a dozen capsules of beef extract, so condensed that one of them will make a quart of bouillon. There are soups and other foods, highly concentrated, put up in little blocks the size of yeast cakes, that when prepared will yield a meal; so that it is quite possible for the man who is going camping out to carry along, in very little space, food as well if he so desires for supplies until he begins to get his own, or to guard against any emergency or for eking out other supplies.—New York Sun.

Welcome: As the missionaries disembarked the naked savages upon the shore testified to their great joy. "You are welcome!" cried these latter: "thrice welcome! For now, in case that we ever desire to be civilized, all we have to do is to kill you and the Christian powers will come with host-pitalities and things and civilize us!" They had no sleeves upon which to wear their hearts, but they seemed sincere for all that.—Detroit Journal.

AT AUCTION
BY WILL E. FISHER
AUCTIONEER

Real Estate Owners.

My Real Estate Department is devoted to the listing and sale of Realty, and is most thoroughly equipped. My methods are peculiarly my own, and are uniformly of satisfaction to all with whom I have business relations. In all the departments the utmost courtesy is extended to all. Special attention given to the subdivision of outlying tracts. Twenty-five and more years experience justifies this statement.

In no department of the Real Estate business should greater caution be exercised than in these departments. EXPERIENCE. TRUSTWORTHINESS AND AFFABILITY are absolutely necessary. Good judgment, business foresight and a devotion to the interests of my clients, while being guided by their personal preferences is my assurance I give to those placing their business in my hands.

WILL E. FISHER, Auctr.

AT AUCTION

SATURDAY, SEPT. 1ST,

AT 12 O'CLOCK NOON, I WILL SELL

Pursuant to a decree signed by Hon. A. S. Humphreys, First Judge of the Circuit Court of the First Judicial Circuit, filed the 2nd day of August, A. D. 1900, in a cause entitled WILLIAM O. SMITH and S. W. WINCHESTER against W. H. WINCHESTER, foreclosure proceedings, notice is hereby given that the property herein described will be sold at the front entrance to the Judiciary Building (Allohuale Hale), Honolulu, on Saturday, the 1st day of September, A. D. 1900, at 12 o'clock noon. The said sale is subject to confirmation by the court.

PROPERTY TO BE SOLD.

First—All that certain piece or parcel of land situate on Quarry street, at Kulaokahua, in Honolulu, Island of Oahu, containing an area of 6,336 square feet, more or less, and being the same premises that were conveyed to W. H. Winchester by deed of W. B. Foster, trustee, dated August 21, 1893, and recorded in Liber 155, page 272, and further described as being a portion of Royal Patent (grant) No. 3564, to H. M. Dow, and bounded and described as follows:

Beginning at a point on the makai side of Quarry street 200 7/10 feet from the south side of Alaiala street extension, thence running by true bearings, south 37 degrees 30 minutes west, 126 feet along the Portuguese Club premises, thence south 52 degrees 30 minutes east, 50 feet along lot 511, thence north 37 degrees 30 minutes east, 120 feet, and north 32 degrees 30 minutes west, 60 feet along Quarry street.

Second—All those certain lots, tracts, pieces or parcels of land situate at Waikiki (near Makee Island) in said Honolulu, being lots 35, 36 and 37, Kekele tract, containing an area of 15,000 square feet, and a part of Royal Patent No. 5667, Land Commission Award No. 5931, and the same premises that were conveyed to the said W. H. Winchester by the deed of W. C. Arhi, trustee, and C. B. Malle, trustee, dated May 11, 1897, and recorded in Liber 167, page 442.

The property will be sold by parcels. Terms cash. If sold coin. Deeds at expense of purchaser.

For further information and full particulars of the above property, apply at the office of WILLIAM O. SMITH, Judd building, corner Fort and Merchant streets.

Dated: Honolulu, August 2, 1900.

JAMES A. THOMPSON, Commissioner.
